

Quiz

Questions: 4

Source: Pasted text

Date: 12/8/2025

1. What is the primary function of the "Public Key Infrastructure (PKI)" in the context of internet security?

- A) To exchange symmetric encryption keys
- B) To verify the identity of users
- C) To provide authentication and encryption for internet traffic
- D) To prevent unauthorized access to data

2. What is the purpose of the "Registration Authority (RA)" in a Public Key Infrastructure (PKI)?

- A) To prevent unauthorized access to data
- B) To verify the validity of digital certificates
- C) To issue and sign digital certificates
- D) To verify the identity of users

3. What is the role of the "Certificate Authority (CA)" in a Public Key Infrastructure (PKI)?

- A) To issue and sign digital certificates
- B) To prevent unauthorized access to data
- C) To verify the identity of users
- D) To provide authentication and encryption for internet traffic

4. What is the name of the popular algorithm used for asymmetric (public-key) encryption in TLS?

- A) Elliptic Curve (ECDHE, X25519)
- B) AES-256-GCM
- C) RSA (2048–4096 bit)
- D) SHA-256

Answer Key

1. C) To provide authentication and encryption for internet traffic
2. B) To verify the validity of digital certificates
3. A) To issue and sign digital certificates
4. A) Elliptic Curve (ECDHE, X25519)
