

Quiz

Questions: 5

Source: Scanned Document 2.pdf

Date: 12/8/2025

1. What type of compounds are described in organic chemistry?

- A) Mineral compounds
- B) Inorganic compounds
- C) Metal compounds
- D) Organic compounds

2. What is the principal constituent atom in organic compounds?

- A) Oxygen
- B) Hydrogen
- C) Nitrogen
- D) Carbon

3. What are the atoms that are usually bonded to the carbon atom in organic compounds?

- A) H, N, O
- B) H, O, N
- C) H, S, Cl
- D) H, S, Cl

4. What is the term for the arrangement of carbon atoms in organic compounds?

- A) Carbon structure
- B) Carbon framework
- C) Carbon skeleton
- D) Carbon backbone

5. What are the other atoms that are often bonded to the carbon atom in organic compounds?

A) H, N, O, S, and the halogens

B) Only H, N, O

C) Only H, N, O, S

D) Only H, S, Cl

Answer Key

1. D) Organic compounds
2. D) Carbon
3. A) H, N, O
4. D) Carbon backbone
5. A) H, N, O, S, and the halogens
